Office, la suite ofimática de Microsoft, es sin lugar a duda el producto más potente del mercado en esta categoría. Su paquete de herramientas permite facilitar y automatizar las actividades habituales de una oficina aunque también tienen aplicación en otros ámbitos como el doméstico o el académico.

En él encontramos programas para gestionar hojas de cálculo, hacer presentaciones de diapositivas y, quizá la función más conocida de todas, la que **sirve para la redacción y edición de textos**. Hablamos de Microsoft Word, cuya primera versión se remonta a 1983.

La cuestión es que hasta hace no demasiado disponer de este procesador de textos requería descargarlo en el disco duro, ya se usase la versión de Windows o la que hay desarrollada para Mac. Sin embargo el desarrollo de mejores conexiones de datos así como del *cloud computing* o la nube, ha permitido la proliferación de servicios a los que cualquiera puede acceder con una conexión a Internet. Y en el caso de este programa hemos visto cómo se ha lanzado la versión en línea en forma de **Microsoft Word Online**.

Sólo necesitas una cuenta de Microsoft e Internet
